System Requirements In order to use AutoCAD Activation Code or AutoCAD LT properly, your computer system must have the following hardware and software configuration: Hardware Specifications Intel Pentium II/III, AMD Athlon or AMD K6 processor 64 MB RAM 2.0 GB Hard Drive PS/2 or USB mouse Ethernet/USB 2.0 port Display resolution of 1280x1024 or greater Software Specifications Microsoft Windows 98/Me/2000/XP/Vista/7 4 GB free Hard Drive Space The update process may be interrupted by having less than 4 GB free space on the hard drive. If you have less than 4 GB free space on your hard drive, you can add more space to your hard drive. To do so, reboot your computer, and then click "Start" and select "My Computer" from the "Start" menu. Right-click on the empty space of your hard drive, and select the "Shrink Volume" option. Once the process completes, your system will have more free space. Note: If you have a dual-boot system, you may not be able to shrink the volume that contains the operating system. If this is the case, contact your computer store to purchase a larger hard drive, or consider using a Mac. Installation and Updating Process Download the AutoCAD or AutoCAD LT Installer and follow the instructions in the software documentation to install AutoCAD or AutoCAD LT. Install AutoCAD on a computer that has sufficient RAM to hold the software. You must install AutoCAD on a computer with a Pentium or better processor, and a 32-bit or 64-bit version of Windows. You can also download AutoCAD and AutoCAD LT as 32-bit or 64-bit Windows software. In either case, you need to use Windows Vista or newer, or Windows XP. To install AutoCAD LT on Windows XP, you must have a minimum of 2.2 GB of free space on your hard drive. If you do not have 2.2 GB of free space on your hard drive, you must download a version of the AutoCAD LT that has an earlier software release. To install AutoCAD LT on Windows XP, select the "Autocad LT 64-bit (x86 and x64) for Windows XP/Vista (R3)"

Applications AutoCAD has supported every version from version 2.0 (1992) up to and including version 2016. AutoCAD 2002 to 2010 AutoCAD 2002 introduced direct link to Microsoft Office and better editability through commands on the Ribbon. It also supported drawing hierarchy via Layers. AutoCAD 2004 to 2008 AutoCAD 2004 introduced partial support for DWG files and introduced 'full screen viewing'. AutoCAD 2006 to 2010 AutoCAD 2006 introduced a suite of new features, including color selection tools and imported objects. A new viewport was introduced. Tools were moved from the tools bar to a toolbar for mouse operation, and user profiles were introduced. AutoCAD 2007 to 2011 AutoCAD 2007 introduced full support for DXF

drawing exchange format, and a new user interface for command buttons on the Ribbon. AutoCAD 2009 to 2016 AutoCAD 2009 introduced a Ribbon with commands embedded in shapes, and text editing enhancements. It also supported text labels on imported objects. It also introduced the ability to set the display setting for temporary views and a range of new view options. The ribbon was completely redesigned and moved to a tabbed interface. AutoCAD 2010 introduced extensions for the addition of non-2D objects to drawings, such as profiles, parametric curves and dimensions. The 2010 version of AutoCAD supported 'measuring' of 3D objects. AutoCAD 2011 introduced Locking and Synchronized Drawing, which allowed users to lock in place either the drawing or the database used to store it. AutoCAD 2012 introduced BIM Manager, which added a component manager to the ribbon with a number of new components for creating content. The drawing environment was extended to support to create new component types, such as stairs, roof, walls, and windows. AutoCAD 2013 introduced Linked Drawing, which introduced a new database system that allowed multiple AutoCAD files to be linked. Support for new web services was introduced, allowing inter-application communication. AutoCAD 2014 introduced a new team workflow that allowed the quick creation of drawings, which were shared via an internal web application. The drawing environment was extended to include text boxes, polylines and annotations. AutoCAD 2015 introduced multi-level documentation for Enterprise users. It also introduced CAM 4D, which allowed for the creation of parametric surfaces. AutoCAD 2016 a1d647c40b

Go to File->Create New->Project Load the work you wish to do. Under Coordinate System select Block or XYZ or User Defined and click on the AUTOCAD button. The coordinate system toolbar will show that you have selected User Defined Coordinate System. Under Options click on the button that reads > Add User Defined Coordinate System> User Defined Coordinate System. Now click on the Add button to add your own coordinate system. The User Defined Coordinate System dialogue will appear. Enter whatever names you want and click OK. Now the CSC button will look like this After this you can add you work by moving your mouse around and making your work visible and selecting with right click. A: According to Autocad Help, you can do that in 2 ways: Select User Defined Coordinate System and click on the button that reads > Add User Defined Coordinate System> User Defined Coordinate System Create a new dimension and define a value for each dimension A: Go to File -> New -> Dimension (or press Ctrl+D on the keyboard). Choose Point, and enter any values you need. Q: What's the origin of "Bad News Bears" about negative reactions to negative news? Every day I see lots of articles about the bad news that is not good for the President or the country and the headlines are usually what Bad News Bears. What's the origin of the association with negative reactions to negative news? I've found this article about the origins of the movie, but I'm not sure that it answers my question. A: I believe this is a reference to the positive way that the ice hockey players are said to welcome bad news (typically bad news for the team they are playing for at the time), since "there is no bad news for a bad team". I've never heard anyone refer to such a bad team as a "bad news bear" but I haven't searched that far, either. A: According to Robert Skulan's answer, the origin may be the way the nickname "Bad News Bears" was used to refer to the team that won the 1984 USA Olympic Hockey team championship, which was considered a bad omen by the team's fans. A previous, similar nickname for a team
